How To Evaluate Embedded Instruction
Data Collection Plan

Directions: Take a moment to think about how you collect data on your implementation of instruction and children's progress. Consider what data you will need for embedded instruction. Use this guide to help you review and reflect.

Data Question	What are we collecting?	What do we need to collect?	How and when will this be collected?	How will we summarize and analyze the data?	Who needs to be involved?
Am I doing it?					
Is it working?
